

2009 NAIP IMAGERY

Data Availability:

 15' Quad complete

Data Layer: 2009 NATIONAL AGRICULTURAL IMAGERY PROGRAM (NAIP)

Primary Layer Name: 2009NAIPnn, where nn refers to the 2-digit 15-minute quad id

Layer Content: COLOR DIGITAL AERIAL PHOTOGRAPHS
Data Structure: RASTER
Layer Type: IMAGE (Georeferenced .tiff files compressed with MrSID)

Source: USDA FSA APFO AERIAL PHOTOGRAPHY FIELD OFFICE
Source Scale: 1:40,000
Source Media: DIGITAL

Automated By: USDA FSA APFO AERIAL PHOTOGRAPHY FIELD OFFICE
Coordinate Reference: NH State Plane Feet
Horizontal Datum: 1983
Tile: 15-MINUTE QUADRANGLE

Status: Complete
Last Revision: 2009
Available From: Complex Systems Research Center, UNH

GENERAL DESCRIPTION

This data layer comprises orthorectified imagery from the National Agricultural Imagery Program (NAIP). NAIP acquires the ortho imagery during the agricultural growing seasons in the continental U.S. The source product is 1-meter ground sample distance (GSD) ortho imagery rectified to a horizontal accuracy within +/- 3 meters of reference digital ortho quarter quads (DOQQs) from the National Digital Ortho Program (NDOP). The imagery may contain as much as 10% cloud cover per source photograph.

GRANIT has re-processed the NAIP data to: 1) re-project the data to NH State Plane feet, NAD83; 2) mosaic the county files into a statewide image; 3) tile the data to 15-minute quadrangle to facilitate distribution; and 4) re-compress the data to MrSID Generation 3 format.

The original, countywide MrSID mosaics are also available upon request from GRANIT (granit@unh.edu).
