GENERAL DESCRIPTION

This data layer comprises statewide 1-foot, color, 4-band aerial photographs. The southern tier was collected in the spring of 2010, while collection of the northern region was delayed until the fall of 2011 due to weather conditions.

The data may be ordered from GRANIT in Geotiff or MrSID format (5000 ft x 5000 ft tiles). Access is also provided through a Web Mapping Service (WMS).

A shapefile containing an index describing the tiling scheme/tile numbers is also available.
