Associated Coverages: NHHouseDists2012 ("Base" house districts)

GENERAL DESCRIPTION

The New Hampshire House of Representatives Floterial District Boundaries, 2012, contains "floterial" district boundaries drawn by the New Hampshire Legislature based on the 2010 US Census population count. Floterial districts overlay other NH House of Representatives districts ("base" districts), which are available from companion shape file NHHouseDists2012. Both data sets are required to depict all NH House of Representatives districts.

District boundaries were derived by applying district codes retrieved from the NH Secretary of State web site to the geometry provided by the GRANIT town boundary layer (PBNH). For sub-municipal districts, ward boundary maps and descriptions were obtained from city offices, and the districts were mapped by extracting appropriate base features (roads, streams, etc.) from GRANIT base map layers.
